MYTHIRAS KICKSTARTER LINK

INTRODUCTION

The campaign setting includes a variety of places to play in. Even when a single place is selected to play in, the trade and collaboration between nations influence your play style, as it is designed as an interactive world of many different cultures.

MYTHIRAS

Mythiras is a setting for 5e, which offers a unique gameplay, and a unique system with a curse. Mythiras encourages challenge and rewards survival. Mythiras is not meant to be a walk in the park, on the contrary, it's designed to face your demons and endure hardships to walk away stronger.

Each person has endured hardships and went through undesired events and survived. While many games are designed to make you forget these dark times, Mythiras encourages players to face these experiences and feel strong emotions. While it's not meant for everyone, different game masters may offer different experiences, from horror to survival. Mythiras offers a variety of gameplay experiences. In a land of sorrow, grief and depression, simple tasks may be a challenge, yet every small win empowers the character.

A NOTE FOR GAME MASTERS & PLAYERS

Mythiras is designed as a grim world for those who seek a darker, more immersive role-playing experience, where the line between right and wrong is thin, and where every action can lead to unforeseen consequences. This includes the Curse of Sorrow, where the players and NPCs are carry the weight of the unfortunate events around them. Every loss weakens them as their sanity slowly wanes.

Nations, factions or even the people of Mythiras is grim. They act on prejudice, fear and hatred. The land steers between a medieval brutality and dystopian mentality, where hope is a currency most can't afford.

However, that is not the only way to play. While the book is designed to be grim, it is easily adaptable for a lighter game. Mythiras includes many aspects, offering you a unique world. For those who seek a lighter experience, simply disregarding a few pages of content in this book could go a long way. You should consult with your players first, explaining the paths you can take in this world. For a lighter experience, you can simply disregard tables such as Mythiran Prejudices, and simplify Dark Magic to a level that it simply uses the life force of its caster, and increase the "Others" percentage in cities of Mythiras.

CHAPTER I

ARCANOMANCER

Arcanomancers are the ultimate blend of arcane expertise and technological ingenuity, transforming raw magic into precise, controlled power. They are spellcasters who have refined their craft to integrate arcane devices, known as arcanotech, into their spellcasting. These practitioners are both inventors and spellcasters, seamlessly blending magical theory with engineering. Feared for their destructive capabilities and respected for their unparalleled innovation, Arcanomancers are artisans of the arcane.

ARCANOMAGICK

Arcanomancers use a special, arcanotech-centered spellcasting that allows them to use their items more efficiently rather than casting vulgar spells. While they can cast these spells, their spells are usually more static, often focused on Abjuration and Evocation than on more vulgar or mystical schools of magic. Their spellcraft is designed for reliability and power rather than creativity or mysticism. To the Arcanomancer, magic is not a force to be feared but a tool to be mastered.

EMPIRIC SPELLCASTERS

Arcanomancers are defined by their empirical approach to magic. They view magic as a force of nature, with rules and mechanisms to be understood, optimized, and exploited. This philosophy puts them at odds with more traditional or intuitive spellcasters, who may see them as rigid or soulless.

PLAYING AN ARCANOMANCER

As an Arcanomancer, you embody the mind of a scientist and the power of a spellcaster. Your spells are tools, and your devices are an extension of your will. Decisions matter as you constantly balance resources, device usage, and magical efficiency. However, your reliance on arcanotech means you must be prepared to protect or repair your creations, as their loss could leave you vulnerable.

ARCANOMANCER CLASS FEATURES

As an Arcanomancer, you gain the following class features.

LEVEL 1: ARCANOTECH PROFICIENCY

As an Arcanomancer, you learn the basics of Arcanotech. You gain Arcanotech proficiency.

LEVEL 1: ARCANOMAGICK

As a student of arcanotech, you have learned to cast spells. The information below details how you use those rules with Arcanomagick spells.

Cantrips. You know one Arcanomancer cantrip of your choice. *Arcane Push* is recommended. Whenever you finish a Long Rest, you can replace one of your cantrips from this feature with another Arcanomancer cantrip of your choice.

When you reach Arcanomancer levels 6, 13, and 18, you learn another Arcanomancer cantrip of your choice, as shown in the Cantrips column of the Arcanomancer Features table.

Workbook. You create a workbook, which includes your spells and your schematics. It is a Tiny object that weighs 4 pounds, contains 100 pages, and can be read only by creatures with arcanotech proficiency. You determine the book's appearance and materials.

The book contains the level 1+ spells you know. It starts with four level 1 Arcanomancer spells of your choice. *Aura Sweep*, *Detect Magic*, *Identify*, *Hex Charge*, and *Shield* are recommended.

Whenever you gain an Arcanomancer level after 1, add two Arcanomancer spells of your choice to your workbook. Each of these spells must be of a level for which you have spell slots, as shown on the Arcanomancer Features table. The spells are the culmination of the arcane research you do regularly.

Energy Points. The Arcanomancer Features table shows how many Energy Points you have to cast your level 1+ spells. You regain all expended Energy Points when you finish a Long Rest. You must expend Energy Points equal to the spell's level to cast it, similar to expending a spell slot.

High-Level Spells. You cannot cast Level 7,8,9 spells using Energy Points. Instead, you must use your Arcanomagick Mastery ability to cast these spells.

Prepared Spells of Level 1+. You prepare the list of level 1+ spells that are available for you to cast with this feature. To do so, choose four spells from your workbook. The chosen spells must be of a level for which you have spell slots.

The number of spells on your list increases as you gain Arcanomancer levels, as shown in the Prepared

Spells column of the Arcanomancer Features table. Whenever that number increases, choose additional Arcanomancer spells until the number of spells on your list matches the number on the table. The chosen spells must be of a level for which you have spell slots. For example, if you're a level 3 Wizard, your list of prepared spells can include six spells of levels 1 and 2 in any combination, chosen from your workbook.

If another Arcanomancer feature gives spells that you always have prepared, those spells don't count against the number of spells you can prepare with this feature, but those spells otherwise count as Arcanomancer spells for you.

Changing Your Prepared Spells. Whenever you finish a Long Rest, you can change your list of prepared spells, replacing any of the spells there with spells from your workbook.

Spellcasting Ability. Intelligence is your spellcasting ability for your Arcanomancer spells.

LEVEL 2: ARCANOCRYSTAL DU

You can charge, but not withdraw, your Energy Points in Arcanocrystals to fuel arcanotech items. You can store up to a number of Energy Points equal to your Arcanomancer level. You cannot charge an arcanocrystal that is already charged, and you cannot store more Energy Points than the arcanocrystal can hold, determined by its rarity.

LEVEL 3: ARCANOMANCER SUBCLASS

You gain an Arcanomancer subclass of your choice. The **Arcanocraft Protocol**, **Arcanopulse Protocol**, **Covert Protocol**, and **War Protocol** subclasses are detailed after this class's description. A subclass is a specialization that grants you features at certain Arcanomancer levels. For the rest of your career, you gain each of your subclass's features that are of your Arcanomancer level or lower.

LEVEL 4: ABILITY SCORE IMPROVEMENT

You gain the Ability Score Improvement feat or another feat of your choice for which you qualify. You gain this feature again at Arcanomancer levels 8, 12, and 16.

LEVEL 6: RECHARGE ARCANOTECH

You can touch an arcanotech device and recharge it as an action by spending Energy Points.

LEVEL 10: ARCANOTECH ATTUNEMENT

You gain three additional attunement slots for arcanotech body modifications, allowing you to attune to three arcanotech items and three arcanotech body modifications simultaneously.

However, this ability causes interference for non-arcanotech magic items. If you are attuned to a regular magic item, you cannot use the additional attunement slots provided by this ability.

LEVEL 15: ARCANOTECH ARMOR

You are proficient with all Medium and Heavy Arcanotech armor, as if you had proficiency in Medium and Heavy armor. By spending 1 energy point, you can negate any penalties of wearing heavy armor for 1 hour.

LEVEL 13: ARCANOMAGICK MASTERY

Your magical mastery allows you to cast higher level spells that are beyond your Energy Points usage.

You learn a level 7 Arcanomagick spell, and can cast it once per day without expending Energy Points. You must finish a Long Rest before you can cast it in this way again.

As shown in the Arcanomancer Features table, you gain another Arcanomancer spell of your choice that can be cast in this way when you reach Arcanomancer levels 16 (level 8 spell), and 18 (level 9 spell).

Whenever you gain an Arcanomancer level, you can replace one of your Arcanomagick spells with another Arcanomancer spell of the same level.

LEVEL 19: EPIC BOON

You gain an Epic Boon feat or another feat of your choice for which you qualify.

LEVEL 20: ARCANO CONDUIT

You gain the ability to overcharge arcanotech around you and bolster the power of your allies.

Whenever you use expend Energy Points to fuel an arcanotech device, you pulsate the energy to also charge any other arcanotech items within 60 feet of you that you choose. Items charged by the pulse are charged with 1 less Energy Point. Arcanotech items charged by your pulse remain charged until used or until the start of your next turn.

You can use this ability for a number of times equal to your Intelligence modifier. You gain all expended uses after you finish a Short Rest.

ARCANOMANCER SCHEMATICS

Schematics are special discoveries of Arcanomancers that grant them special edges. These schematics are almost exclusively used by Arcanomancers, but some Denzian spellcasters are known to use some of these schematics through unknown means.

Once an Arcanomancer gains a schematic, it must be studied and installed at an Arcanohaven. Alternatively, the Arcanomancer can spend a Long Rest to craft and install the schematics on themselves, which costs around 500 gp worth of arcanocrystals or 200 gp worth of pure arcium.

Any schematics that can be worn only function on Arcanomancers who know the schematic. If you remove a schematic that reduces your Energy Points, you regain the reduced Energy Points. However, wearing or installing a schematic while not having the required Energy Points prevents the schematic from functioning until you regain Energy Points.

AGILITY MATRIX

Prerequisite: Level 9+, Arcanotech Nerves

This arcanotech device allows you to respond to dangers quickly, increasing your reflexes beyond mortal limits. When activated as a Reaction, you spend 2 Energy Points, it remains active until the start of your next turn.

This arcanotech is worn over as a tight mesh vest, which diminishes your arcane signature and protects you from Divination magic. You can't be targeted by any Divination spell or perceived through magical scrying sensors. You can spend 10 minutes to Doff the vest.

This schematic is always active and decreases your maximum Energy Points by 2.

ARCANE SUPPRESSOR

Prerequisite: Level 15+

You craft suppressor gauntlets that can inhibit the magical abilities of others. When you hit a creature with a melee attack, you can expend 2 Energy Points to force the target to make a Constitution saving throw (DC = 8 + your Proficiency Bonus + your Intelligence modifier). On a failed save, the creature cannot cast spells until the end of its next turn.

This schematic is always active and decreases your maximum Energy Points by 5.

CASTING BOOSTERS

Prerequisite: Level 9+

You install pre-defined pathways to cast Arcanomancer spells with ease.

Choose one Arcanomancer spell that you can cast. You can spend double the required Energy Points to cast that spell that has a casting time of Action as a Bonus Action.

You can change your chosen spell as a part of a Long Rest.

Repeatable. You can gain this schematic up to three times, upgrading your schematic each time. Each time you do so, you can choose an additional spell that you can choose to cast as a Bonus Action.

Any magic or arcanotech dagger can be installed as a covert blade. However, creating a covert blade is a delicate process that requires a talented arcanocrafter. Modifying an arcanotech dagger costs 1½ of the original price, and it costs double for magic daggers.

DARKVISION MATRIX

You craft an implant that resembles glasses, or is implanted around your eyes, which allows you to see in the dark.

You gain Darkvision up to 60 feet, or your darkvision increases by 30 feet.

Repeatable. Each time you take this schematic, your Darkvision range increases by 30 feet.

This arcanotech spine is mounted on the back along the spine. When activated as a Bonus Action, you can spend up to a number of Energy Points equal to your Proficiency Bonus. For each Energy Point spent, you gain 1d4 Temporary Hit Points.

Once you use this schematic, you cannot do it again until you finish a Short or Long Rest. You can only equip a single Arcanotech Spine.

HEART PUMP*Prerequisite: Arcanotech Nerves*

You add arcanotech wiring around your heart, which allows automatic reactivation of your bodily functions when you are in distress.

When you fail a Death Saving Throw, you can use your Reaction to spend 2 Energy Points to succeed on the save instead.

You can “capture” a number of memories equal to your Intelligence modifier. As long as you don’t replace the memory fragment, you can access it anytime without a need of a roll. In each memory fragment, you capture a perfect snapshot of what you see, hear, and otherwise sense for up to 6 seconds. You can memorize pages, schematics, or creatures and recall them with ease. You must be able to perceive what you attempt to preserve. For example, you can focus on a page or a scroll and remember it with perfect recall, however, you cannot skim through a book and remember it fully.

ARCANOMANCER SUBCLASSES

Arcanomancy has diverse protocols to study. Each protocol represents a whole new field of study, which a lifetime is required to master.

COVERT PROTOCOL

Hide and Strike From the Shadows

Deadly and elegant, Arcanomancers of the Covert Protocol are experts of stealth.

LEVEL 3: ARCANOCLOAK

You build yourself a small cloaker arcanotech device under your skin, which allows you to cast *Invisibility* on yourself. When you do so, you remain Invisible for 1 minute. You can use this ability for a number of times equal to your Intelligence modifier (minimum of 1). You regain all uses of this ability when you finish a Long Rest.

When you reach 7th level in this class, your cloak cannot be seen with *See Invisibility* spell.

LEVEL 3: CALCULATED MANIPULATION

You learn to observe and calculate every word to achieve the best result. Whenever you make use Deception, Intimidation, or Persuasion skill, you can use your Intelligence modifier instead of Charisma modifier.

LEVEL 7: ARCANOJUMP

As a Bonus Action, you can spend 3 Energy Point to teleport yourself to an empty space within 30 feet of you that you can see. Using this ability does not reveal your location or foil your Invisibility.

LEVEL 13: ARCANOSHROUD

You can use your Arcanocloak ability at will and your Arcanocloak invisibility persists when you make an attack. Furthermore, while your Arcanocloak is active, you cannot be detected by Blindsight.

LEVEL 17: DEATH STRIKE

Whenever you make a melee attack against a creature when you are invisible, you can spend 5 Energy Points to turn the attack into a Critical Hit. If the creature is normally immune to Critical Hits, you can instead spend 10 Energy points and ignore the target's immunity.

Once you successfully use this ability on a creature, you cannot use it against the same creature until you finish a Short Rest.

WAR PROTOCOL

Unleash the Might of Arcanotech

The focus of war revolves around using Arcanotech items rather than spellcasting or creating items. These Arcanomancer are warriors, operators and

LEVEL 3: OPERATOR PROFICIENCY

The chosen statistic is doubled. If used on an arcanotech weapon, additional damage from Attributes are not multiplied, but increased damage due to spend energy points are multiplied.

DARK MAGE

The dark arts whisper promises of forbidden power, tempting those bold enough to transcend conventional magic and morality. Dark Mages delve into the shadowed corners of arcane knowledge, embracing magic fueled by despair, fear, and the very essence of death. Unlike traditional spellcasters, they thrive on manipulation and sacrifice, wielding forces that few dare to comprehend.

DARK MAGIC

Dark magic is not a discipline learned through rigorous study or skill. It is a pact, an intimate understanding of the darker aspects of the **weave**. This magic often draws upon life energy, emotions, or even the very souls of others to fuel its potency. Dark Mages excel at necromancy, curses, and illusion, weaving dread and despair into their spells. Their magic is often subtle, creeping like a shadow before striking with devastating force.

THE PRICE OF POWER

To wield the dark arts is to sacrifice. The path of the Dark Mage is fraught with risk, as dark magic constantly demands a toll. Every spell may exact a price, from the caster's own vitality to the trust and humanity of those around them. The lure of immense power can corrupt even the strongest of wills, and many Dark Mages teeter on the edge of losing themselves to the very forces they command. Some may bargain with ancient entities for knowledge, becoming entangled in pacts that bind them to sinister purposes.

PLAYING A DARK MAGE

As a Dark Mage, players must embrace the consequences of their power. Decisions hold weight, as the use of dark magic can draw suspicion, hostility, or outright fear from others. However, they also wield immense power in both combat and intrigue, capable of devastating enemies with shadowy invocations or manipulating events from the shadows.

DARK MAGE CLASS FEATURES

As a Dark Mage, you gain the following class features.

LEVEL 1: SPELLCASTING

By studying and meddling with dark entities from the universe, you have been granted the ability of spellcasting. The information below details how you use those rules with Dark Mage spells.

Cantrips. You know four Dark Mage cantrips of your choice. **Light, Mending, Prestidigitation, and Shadow Lash** are recommended. Whenever you gain a Dark Mage level, you can replace one of your cantrips from this feature with another Dark Mage cantrip of your choice.

When you reach Dark Mage levels 4 and 8, you learn another Dark Mage cantrip of your choice, as shown in the Cantrips column of the Dark Mage Features table.

Spell Slots. The Dark Mage Features table shows how many spell slots you have to cast your level 1+ spells. You regain all expended slots when you finish a Long Rest.

Prepared Spells of Level 1+. You prepare the list of level 1+ spells that are available for you to cast with this feature. To start, choose two level 1 Dark Mage

spells. Burning Hands and Detect Magic are recommended.

The number of spells on your list increases as you gain Dark Mage levels, as shown in the Prepared Spells column of the Dark Mage Features table. Whenever that number increases, choose additional Dark Mage spells until the number of spells on your list matches the number in the Dark Mage Features table. The chosen spells must be of a level for which you have spell slots. For example, if you're a level 3 Dark Mage, your list of prepared spells can include six Dark Mage spells of level 1 or 2 in any combination.

If another Dark Mage feature gives spells that you always have prepared, those spells don't count against the number of spells on the list you prepare with this feature, but those spells otherwise count as Dark Mage spells for you.

Changing Your Prepared Spells. Whenever you gain a Dark Mage level, you can replace one spell on your list with another Dark Mage spell for which you have spell slots.

Spellcasting Ability. Charisma is your spellcasting ability for your Dark Mage spells.

Spellcasting Focus. You can use an Arcane Focus as a Spellcasting Focus for your Dark Mage spells.

Dark Magic. Spells you cast are always considered Dark Magic.

LEVEL 2: DARK KNOWLEDGE

Your dark knowledge expands your magical prowess. Choose one 1st-level spell from the Cleric, Druid, Sorcerer, or Wizard spell list. You learn to cast that spell. This spell is Dark Mage spell for you.

At higher levels, you gain more spells of your choice that can be cast in this way as shown in the Dark Knowledge column of the Dark Mage Features table. Each time you gain a spell, you can choose a new spell list.

Additionally, you learn Dark Tongue.

LEVEL 2: DARK MANIFESTATIONS

Your Dark Magic starts to alter your body, and you start to gain Dark Manifestations. You gain a Minor Manifestation. You gain more manifestations as you gain further levels. You gain another Minor Manifestation at level 6, 10, 14, and 18.

You gain a Major Manifestation at level 5, and then again at level 10, 15, and 20.

You gain a Defining Manifestation at level 8, and then again at level 16.

LEVEL 3: DARK MAGE SUBCLASS

You gain a Dark Mage subclass of your choice. The **Bladecaster, Dark Evoker, Dark Healer, Hordemaster, and Shadowcaster** subclasses are detailed after this class's description. A subclass is a specialization that grants you features at certain Dark Mage levels. For the rest of your career, you gain each of your subclass's features that are of your Dark Mage level or lower.

LEVEL 4: ABILITY SCORE IMPROVEMENT

You gain the Ability Score Improvement feat or another feat of your choice for which you qualify. You gain this feature again at Dark Mage levels 8, 12, and 16.

LEVEL 5: DARK BOON

You add 1 Necrotic damage to Dark Mage cantrips for each Dark Manifestation you have.

LEVEL 7: NECROTIC MASTERY

You can choose to take Necrotic damage equal to the spell level that you cast to deal Necrotic damage with that spell instead. When you take this Necrotic Damage, you become Tainted until the start of your next turn.

LEVEL 9: DARK RESILIENCE

When you are subjected to a condition, you can use your Reaction to take damage and rid yourself of the condition. You must take 1d10 Necrotic damage for Blinded and Deafened conditions, 1d12 Necrotic damage for Charmed, Frightened, and Stunned conditions, and 1d20 for Paralyzed, Petrified, and Unconscious conditions. You must have at least 1 Hit Point to use this ability. When you take this Necrotic Damage, you become Tainted until the start of your next turn.

LEVEL 11: SAP SOUL

You learn to sap the soul enemies you slay to heal yourself. Whenever you drop a creature to 0 Hit Points through weapon attacks or Dark Magic, you can use your Reaction to regain Hit Points equal to the creature's Hit Dice, with a minimum of one.

You can use this feature a number of times equal to your Charisma modifier (minimum of once), and you regain all expended uses when you finish a Long Rest.

LEVEL 13: DARK TAINT

You gain the ability to taint your enemies for a short period of time. Tainted enemies cannot recover Hit Points.

Before you cast a spell or use an ability that deals Poison or Necrotic damage, you can use your Bonus Action to taint your attack. Targets that takes damage become Tainted until the start of your next turn.

You can use this feature a number of times equal to your Charisma modifier (minimum of once), and you regain all expended uses when you finish a Long Rest.

LEVEL 15: DARK ASCENDANT

You gain Resistance to Necrotic damage. You can inflict yourself 1 Necrotic damage per your Hit Dice to heal while Tainted.

LEVEL 17: DARK HARVEST

You gain the ability to cheat death through Dark Magic. When you drop to 0 Hit Points, you gain a number of Hit Points equal to the creatures you have dropped to 0 Hit Points within 120 feet of you. You can use this ability on a creature only once. You cannot choose which creatures you use this ability on.

LEVEL 19: EPIC BOON

You gain an Epic Boon feat or another feat of your choice for which you qualify.

LEVEL 20: CHILD OF DARKNESS

You learn to trade your life force to accumulate greater power. You can use your Hit Points to fuel your dark magic. For each spell level you recover, you take 1d4 Necrotic damage. When you take this Necrotic Damage, you become Tainted until the start of your next turn. You can only recover spell slots up to level 5 using this ability. Spells of level 6 or higher cannot be recovered.

LEVEL 20: THE CURSE OF ETERNITY

You become a vessel of eternal life, but at a terrible cost. You no longer age, and your body becomes an unnatural, unearthly being that does not belong to the world of the living.

You must ritualistically sacrifice 13 mortal vessels annually. Every week you fail to do so, you gain a level of incurable exhaustion when you finish a long rest at the end of the week until the sacrifice is fulfilled.

DARK MANIFESTATIONS

As a Dark Mage grows in power, the physical manifestations begin to show their true identity. While these manifestations can be hidden through magic or disguise, they cannot be cured.

MINOR MANIFESTATIONS

The minor manifestations may cause others to view you with suspicion, fear, or awe. Many might avoid direct contact, while others may be drawn to you out of curiosity or an instinctive need to understand the power you wield.

Backwards Knees. Your knees are twisted, and bend backwards when you walk.

Blackened Teeth. The Mage's teeth start to blacken from the root. In time, they grow completely, unnaturally dark.

Blood Tears. The mage cries only blood. A faint trickle of blood may run from your eyes during particularly intense moments, like when casting a particularly powerful spell or in moments of extreme emotion. The blood appears to be unnatural and darker than normal.

Dark Aura. When casting spells or exerting yourself, the air around you becomes heavier and colder, and dark mist forms around your body, though it dissipates as quickly as it appeared.

Glowing Eyes. Your eyes glow in the dark with an otherworldly color.

Grim Presence. The atmosphere around you subtly shifts. Lights may dim around you, and the air becomes colder. People may take a step back when you approach, though they may not understand why.

Horns. Horns grow out of your skull.

Nails of the Night. The tip of the Dark Mage's nails start to blacken. In time, they grow completely, unnaturally dark.

Flickering Shadow. Your shadow occasionally lags behind, becomes elongated, or distorts, especially when you are under emotional strain or performing magical tasks. At times, the shadow may mimic your actions in a slightly delayed, disjointed manner.

Shattered Reflection. When you look into a reflective surface, your image flickers or distorts. The reflection may appear briefly as a twisted, shadowed version of yourself or show something different altogether, only for the image to return to normal.

MAJOR MANIFESTATIONS

Major Manifestations are significant, usually visible signs of the character's transformation. These manifestations can cause discomfort to those around them, as they mark the character as someone touched by dark and unnatural powers.

Black Blood. The Mage's blood turns dark, and it can be seen from the skin. The mage gains Resistance to Poison damage and Advantage on saving throws to resist becoming Poisoned.

Dark Claws. Your nails grow into natural weapons. Your unarmed attacks deal 1d6 Slashing damage. Your claw attacks are magical.

Dark Strength. Increase your melee damage rolls by 1 for each Dark Manifestation you have, including this one.

Dark Eyes. Eyes of the Mage turn pitch black. Your Darksight range is increased by 60 ft., and you can see in magical Darkness.

Dark Personality. You gain expertise with Deception or Intimidation skill. You cannot have Disadvantage on the skill you choose.

Dark Physique. You gain Advantage on Concentration checks. Additionally, you can use your Charisma modifier instead of Constitution to gain maximum Hit Points.

Dreadful Aura. A slight aura of dread surrounds you, making others uneasy in your presence. Creatures within 10 feet of you have Disadvantage on saving throws against fear effects.

Ebon Veins. Dark veins, like cracks in obsidian, start to spread across your skin. They are barely visible in the light but become more pronounced when you cast spells. You gain a +1 bonus to your AC while you maintain Concentration.

Gloomstrider's Feet. Your footsteps leave faint, darkened marks wherever you walk, and your movements become unnaturally graceful. You can traverse in the air as if it were made of solid ground. You must end your turn on solid footing. You can move through difficult terrain without expending extra movement.

Hidden Magic. When you cast a spell, you can cast it without Somatic or Verbal components. You must choose one. You take 1d4 Necrotic damage when you use this ability.

Shadow Step. As a Bonus Action, you can teleport to a shadow that you can see within 30 feet of you. You become Invisible until the start of your next turn. You can use this ability once per Short Rest.

Soul Magic. When you cast a spell, you can cast it without any Material components, unless the Material components are consumed by the spell or have a cost specified in the spell description. You take 1 Necrotic damage when you use this ability.

Steps of the Predator. Your footsteps subtly dim the surrounding light, casting a shadow that seems to follow you. In shadows and darkness, your movements don't make any noise, and other creatures cannot perceive you through hearing.

Tainted Voice. Your voice takes on a haunting quality, echoing with a deep, resonant tone that seems to carry with it an unsettling power. You have Advantage on Charisma (Intimidation) checks.

Third Eye. The Mage grows a third eye on the forehead. You automatically detect any lie that is told to you by a creature whose Charisma modifier is lower than your Proficiency Bonus.

DEFINING MANIFESTATION

The true masters of the Dark Arts display unsettling portraits of their dark powers. Defining Manifestations mark the ultimate transformation of the Dark Mage. These are the defining physical and magical changes that indicate the character has fully embraced the corrupting power of Dark Magic. These manifestations often carry powerful narrative weight and are difficult to hide.

Abyssal Form. You can take a shadowy form as an action that lasts for 10 minutes. Your body distorts into an unnatural, shadowy version of yourself, as if part of your soul has become one with the void. Your appearance becomes partially incorporeal, and your physical form becomes difficult to touch or harm. You gain Resistance to all damage except Force, Psychic, and Radiant damage. In addition, while in Dim Light or Darkness, you can phase through walls and obstacles as though they were difficult terrain, but you cannot end your turn inside an object. You cannot attack or cast spells in this form.

Once you use this ability, you cannot use it again until you finish a Short Rest.

Bone Armor. You gain an armor made of bones and human remains. You can conjure or dismiss the armor as a Bonus Action. When conjured, you automatically don the armor. Your AC becomes 18.

Dark Omens. You can peek into the future and learn about the true intentions of a single creature that you can see, and only at night. To do this, you must name the name of the creature. You recite the name of your target and ask a simple question about them. Only 1 question can be asked about a single creature in a single night. You take 1d20 Necrotic damage upon activation.

Dark Personality. You can cast *Charm Person* on one creature within range as a Magic action. The creature must succeed on a Wisdom saving throw against your spell DC or be charmed for 1 hour. You take 1d20 Necrotic damage upon activation.

Dark Physique. Your melee weapon attacks deal an additional 1d6 Necrotic damage.

Dark Wings. You gain Wings, which give you Fly speed of 30 feet (hover).

Eyes of the Abyss. Your eyes turn fully black, giving you an unnerving, predatory look. The void of your gaze can unnervingly pierce the minds of those around you. You gain Truesight up to 30 feet.

Living Shadow. Mage's shadow swirls and shifts constantly. You can command your shadow as a Bonus Action to occupy a single adjacent square. The occupied square is considered to be in total darkness, which you can see without penalty. Your shadow remains in the square until you move to an another square, or dismiss your shadow.

Nightmare Cloak. You have a dark mantle around you that you can activate at will as a Bonus Action to become Invisible. Your invisibility lasts until you make an attack or lose Concentration.

Unholy Fortitude. Your Hit Dice from Dark Mage class increases to D10.

ARCANOTECH

Arcanotech is the general term for items created by Denzian Arcanomancers. While arcanotech is more ancient than Denzian Arcanocracy, it is most studied by the Arcanomancers.

Arcanotech operates using arcane energy. Unlike spells, these magical wonders process raw arcane energy and activate based on their unique designs.

ARCANOTECH PROFICIENCY

When a creature has proficiency in arcanotech, it gains proficiency in operating arcanotech devices and weapon. Additional proficiencies might be required.

For example, if a creature is proficient with arcanotech, but not with Martial weapons, the creature can activate the weapon's arcanotech bonuses, but the penalties for using a Martial weapon without proficiency still applies.

ARCANOTECH DEVICE USE

Arcanotech items requires energy points or a spell level sacrifice to activate. Most items are activated for a whole day, while some additional powers might require expenditure of additional arcane energy. Furthermore, some items have additional functions based on their spell levels sacrificed. Arcanotech items rarely require attunement. The energy point or the spell slot sacrificed is limited by the item's rarity, unless it is stated otherwise in the item's description.

In order to use or charge Arcanotech items, the creature attempting to use or charge it must be proficient with Arcanotech. Furthermore, spell levels are not sacrifices as efficiently as Energy Points. Unless the arcane spellcaster uses an Arcanotech Link, the spells sacrificed must be a level higher than normal. This can exceed the maximum spell level sacrificed for arcanotech items.

For example, if an uncommon arcanotech dagger deals an additional 1d6 force damage for each spell slot sacrificed, an arcane caster must sacrifice a 2nd level spell slot in order to gain 1d6 bonus damage, or a 3rd level spell slot to gain 2d6 bonus damage. An arcane spellcaster can sacrifice up to level 5 spell slot, in order to gain maximum benefits of additional 4d6 damage, exceeding maximum spell level sacrificed for an uncommon arcanotech device due to the inefficiency.

ARCANOTECH ACTIVATION COST

Rarity	Max Energy Points / Spell Level Sacrificed
Common	3
Uncommon	4
Rare	5
Very Rare	6
Legendary	7

ARCANOCRYSTALS

Arcanotech items can be fueled by Arcanocrystals. These crystals are imbued with raw spell power, similar to spell scrolls. Instead of storing a spell, these crystals store raw spell power, which can be used by Arcanotech items or Arcanomancers. Arcanocrystals are typically sold in Denzia, but they are much harder to find elsewhere.

The amount of Energy Points an arcanocrystal can hold depend on its rarity. Arcanocrystals have two states, charged or empty. Charged arcanocrystals cannot be recharged.

Arcanocrystals are made from a special matter called **Arcium**. While Arcium is a mercury-like liquid metal in its raw form, when charged, it transmutes into a semi-opaque, silvery crystal that acts as a magical capacitor. The rarity of the arcanocrystals are based on its craftsmanship, rather than its material.

Arcanocrystal costs are based on the arcanocrystal rarity, and whether it is charged or not. Charge prices are given separately, as high-tier crystals can be bought half-charged.

Charging an Arcanocrystal is a lengthy process. In order to stabilize the crystal, large amounts of Energy Points or equivalent arcane energy must be fed into the stones. While some Arcanomancers can create less stable versions, they are not fit for commercial use.

To charge an arcanocrystal, an Arcanomancer must expend EP as shown in the Charge EP column in Arcanocrystal table. The EP must be spent by a single Arcanomancer, everyday for 7 days in order to create a charged crystal.

ARCANOCRYSTAL COST

Energy Point & Tier	Empty Crystal Cost	Charged Cost	EP Capacity
1	50 gp	100 gp	2
2	150 gp	250 gp	5
3	300 gp	500 gp	10
4	1,500 gp	2,500 gp	17
5	3,000 gp	5,000 gp	26
6	6,000 gp	10,000 gp	37
7	15,000 gp	25,000 gp	50

A.C.E.

Arcanotech Companion Eye, or also known as simple the A.C.E., is an arcanotech wonder that is created to accompany Arcanomancers. They are smart, loyal minions that resemble unique golems. However, as arcanoroids, Eyes are sentient creatures with intelligence comparable to canines.

ACE is your everyday arcanotech companion to satisfy your recon and observation needs. This vigilant companion will provide you with a second set of eyes to ensure your survival!

Arcanotech. A.C.E. is made using Arcanotech and it cannot be replicated with arcane magic. While its design is widespread in Denzian Arcanocracy, its exact origin remains unknown.

Eye's Bond. These arcanoroids search for a master to bond, and protect them with all they have when they find one. In order to bond, one must wear the Gift of the Eye that is attuned to the construct. They seek acknowledgment and attention from their masters, and zealously guard them when they are most vulnerable.

Scouts & Spies. A.C.E. is a construct that is designed for reconnaissance. They can scout ahead for Arcanomancers, guard against dangers and even help out in combat.

GIFT OF THE EYE

Arcanotech Ring, Rare (Requires Attunement)

This simple iron bands allows controlling of the attuned Eye. While attuned to this ring, you can communicate with the Eye, and can understand the sounds it makes. Furthermore, The Eye can activate the ring for up to 1 mile away with an encoded message. Similarly, you can give pre-determined commands to your Eye using the ring while within range.

If your Eye is destroyed, the ring powers down permanently and cannot be activated.

SORROW BUTCHER

These malignant creatures are twisted souls of murderers who are empowered by the sorrow they inflict on others. They seek to murder innocents to spread the sorrow. As these creatures were once murderers themselves, they follow their own habits to maximize fear they instill in the honest folks' hearts.

Ritual Spawned. Sorrow butchers cannot form naturally. They must be spawned through unholy rituals that are only known to the Cult of Sorrow. It is speculated that they can be commanded by these cultists to do their bidding, as long as it serves furthering the Curse and its grip.

Sorrow Affinity. Sorrow butchers can detect the Sorrow rating of creatures around them. Their ultimate goal is to spread sorrow, therefore they don't attack creatures that has higher Sorrow ratings. Butchers always pursue creatures of innocence and select them as their victims instead.

Sorrow Focused. While butchers don't have an instinct for self-preservation or survival, they are focused on their duty to spread sorrow. While making a decision, they seek the path that benefits the Curse of Sorrow.

WEeping MOTHER

The Weeping Mother is a grotesque and sorrowful entity, her form a twisted amalgamation of humanoid features and otherworldly deformities. Her presence fills the air with a chilling wail that echoes despair, leaving none who hear it unaffected. Her spawnlings skitter around her, small, malformed creatures that resemble infantile versions of herself, both pitiful and horrifying. Now these creatures wander around the dark, punishing those who they believe to be a threat to their spawns.

Origin Legend. Legends speak of these creatures as a cursed figures, tragic soul who succumbed to despair and rage. Driven mad by loss, and forever transformed into this monstrosity, endlessly mourning its stolen children. Her spawnlings are not true offspring but extensions of her cursed essence, mindlessly devoted to their mother and bound to her will. Wherever she roams, she spreads a trail of grief and suffering, drawing in those unlucky enough to cross her path.

No one knows how they exactly came into being, or who created them, but slayers are rewarded handsomely for eliminating these monstrosities.

Humane Tactics. A Weeping Mother is a monster by all means, but it preserves a portion of its sentience and understanding. It can disguise itself, deceive others or lure them through telepathy to feed its spawn.

Targeted Aggression. Weeping Mother is not inherently a hostile creature. However, it becomes hostile with trivial matters. Staring it for more than a few seconds, attempting to observe, touch or come near its spawn is enough to invoke its wrath. However, legends claim that a Weeping Mother would never hurt a pure soul.

ARCANGEL

It serves as an unyielding sentinel, protecting long-lost secrets with unwavering loyalty. Its bladed weapon hums with magical energy, and its jet-like propulsion systems allow it to dominate the battlefield from the skies. When cornered, it can unleash devastating bursts of arcane energy, laying waste to all in its path.

Ancient Arcanotech. These war machines are created through ancient protocols, still undiscovered by even the brightest of Denzian Arcanomancers. As a testament of what Arcanotech can achieve, these creatures are sentient arcane machines that can combat threats in any terrain. Effectively, they can eliminate threats in any environment, even if the threat is much larger than a single Arcangel.

Combat Network. An Arcangel is a fearsome sight, but by design Arcangels are designed to act as one without any verbal communication. Together, they swarm large war machines and blitz in and out, seemingly gaining momentum as they progress through the battle.

Sentient Creatures. While it is easy to be frightened by these hulking arcanotech wonders and mistake them with monstrosities, Arcangels are fully sentient creatures with personality. They serve as soldiers, but those who are lucky enough to delve into the cities created with arcanotech can encounter Arcangels as smiths, inn keepers, or even scholars of arcanotech.
